CLEANSOURCE®
HD625 UPS

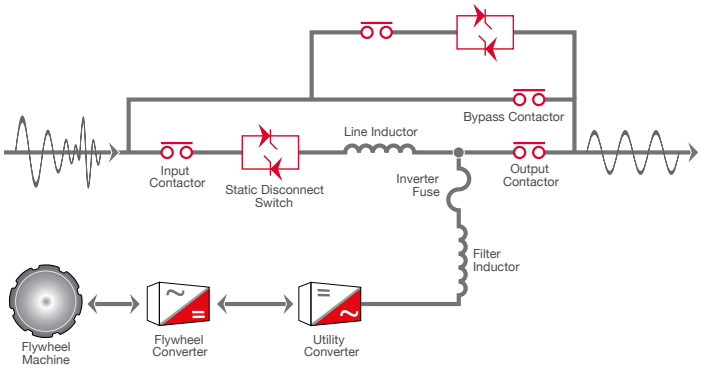
Overview

Active Power's CLEANSOURCE® HD625 delivers 40% TCO savings, is 12 times less likely to fail, and reduces your impact on the environment by 90%.Based on a field-proven design, our flywheel UPS is a perfect fit for today's mission-critical applications in data centers, health care facilities, and industrial and manufacturing sites.

Parallel Online Architecture

The CLEANSOURCE® HD625 is rated at 625kVA/625kW. Up to 7 UPS systems can be paralleled for redundancy or capacity, supporting over 4.3MW of back-up power in a single paralleled system.

Active Power's Parallel Online Architecture provides excellent isolation between input and output, while delivering a clean sinusoidal waveform to critical loads. CLEANSOURCE® HD625 UPS is able to protect against all nine IEEE power disturbances, such as voltage fluctuations, harmonics and complete power outage.



Service and Maintenance

Active Power has designed the CLEANSOURCE® HD625 with ease of maintenance in mind to ensure your critical power infrastructure operates with the utmost reliability. CLEANSOURCE® HD625 requires one simple and non-invasive annual maintenance . A streamlined maintenance schedule both restores your UPS to factory-like condition and reduces downtime during its operating life, thereby improving the availability of your operation.

▶ SUPERIOR ENERGY EFFICIENCY

Over 96% efficient at 40% load.

▶ REDUCED COOLING NEEDS

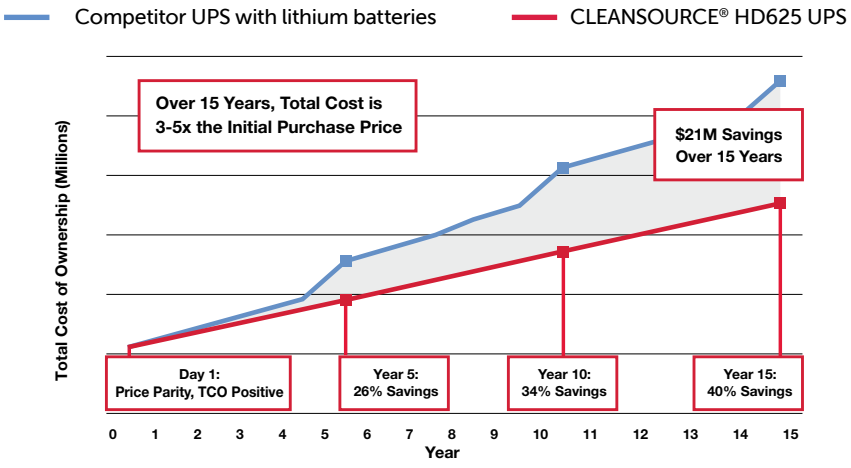
No need for dedicated cooling for batteries

▶ LOWER MAINTENANCE REQUIREMENTS

Routine annual check-up and bearing change every third year.

▶ NO BATTERY CHANGES

Integrated flywheel with 20-year life.



Proven to be 12 times less likely to fail than a battery-based system, the integrated flywheel energy storage of the CLEANSOURCE® HD625 UPS makes it inherently reliable, delivering predictable, consistent back-up power. The flywheel is constantly spinning, storing kinetic energy and ready to assume the load in case of a power outage. By contrast, battery failures are the leading cause of UPS load loss and system downtime.

CLEANSOURCE® HD625 UPS is the smart and responsible choice for the environment, saving thousands of tons of carbon from being emitted. The integrated flywheel permanent energy storage uses up to 90% less embedded carbon to manufacture versus lead-acid batteries. CLEANSOURCE® UPS high efficiency and lower cooling requirements contribute to lower power consumption and reducing operational carbon emissions by 40% over the life of the product. In comparison with lead-acid batteries, flywheels last up to 20 years, are not toxic, take up 50% less space and require less maintenance.
